

This is the 2018 **The Refiner's Fire** calendar.

NOTE: For 2018 our calendar and the traditional Jewish calendar differ *only slightly!* For example the 1st day of the month sometimes differs due to the way the two calendars determine the new month. Questions can be directed to The Refiner's Fire, Calendar@therefinersfire.org.

This calendar is based on Genesis 1:14 which says "Let there be lights in the dome of the sky to divide the day from the night; let them be for signs, seasons, days and years" and uses the real sun, moon and stars. The sun and moon are witnesses in and of themselves – no "two (human) witnesses" are needed to attest to a "sighted crescent" to determine the beginning of the month.

Levites of old did far more than simply wait for two witnesses to come forward to say they saw a crescent! Indeed, they observed the moon throughout the whole month, including all these factors: New crescent, full moon rise & set, old crescent, its position with respect to the sun at sunrise and sunset, as well as the time of sunset in Jerusalem. All these witnesses come together to determine the day of the lunar conjunction (which itself is not visible), and hence, which sunset after conjunction becomes the 1st day of the new Hebrew month. Indeed, by waiting to "sight" the new crescent, the calendar can be up to 3 days off!

While the modern traditional rabbinic calendar *calculates* the day of a new month by "rules" depending on its impact to *future* High Holy Days (commanded Feast Days) such that the rabbis don't permit Yom Kippur to fall on Friday or Sunday, this calendar permits all Holy Days to fall when they fall! This calendar also recognizes the importance of the *Full Moon* as witness of the middle of the Hebrew month. When the full or nearly full moon rises just before or at sunset (in Jerusalem), the Hebrew calendar date *should* change from the 14th to the 15th! If instead you relied on the "sighted moon", then *the month will have started late*, and come the "15th", the *already past-full moon rises an hour or more after sunset*, and you should go "uh oh" because the moon itself is announcing the month is well past half over!

This calendar recognizes that when the New Moon is "renewed", it is in conjunction, before sunset in Israel, then sunset that very evening becomes the *first day* of the new month. When conjunction is after sunset in Israel, then the month just ending requires an extra day, a 30th. Thus, our calendar lists the time of New Moon from Jerusalem. You can therefore see, for example, that when the

A note on the colors used in the calendar grids:

A date colored "Purple" is always the 1st day of the common month of the Gregorian Calendar, Jan-Dec.

Dates colored "Yellow" denote the period of the Full moon. Cells colored "Green" denote the period of the New moon.

Dates colored "Blue" denote the 1st of the Hebrew month (which actually began at sunset the prior evening).

Two consecutive days are displayed as Yellow for Full moon or Green for New Moon because the event (i.e., "full" or "new" moon) crosses "two" days – that is, the event happens sometime within the overlap of the Gregorian day and the Hebrew day.

Updated: March 14, 2017

New Moon is before sunset in Jerusalem, the new month begins at sunset that very evening.

(*High Sabbath: These are the set-apart days of the commanded feasts. They are called "high Sabbaths" because they are days of holy convocations, no work, time with YHWH, and rest. The weekly Sabbath is set apart on its own, distinct from the high Sabbaths. See Leviticus 23.)

(†The new moon of Nisan each year is chosen so Pesach falls on or after the start of Spring. If Pesach would fall before Spring, then a "leap month" is added. In leap years, the 2nd Adar is always known as "Adar" though on calendars the two months are usually labeled "Adar I & Adar II", or "Adar & Adar Sheni". Purim and Adar birthdays are always in the 2nd Adar if there is one that year.)

Note: "Parsha", the weekly Torah portion, is used in the calendar grids. It is the same as "Parashat ha-Shavua".
